

<b>Abstract title</b>	<b>Session</b>
Elucidating the Mechanism of Lipid Translocation by the Canalicular ABC Transporter MDR3	1
Efficient Method for the Generation of Multiple Knock Outs by CRISPR/Cas9 Based on a Multicolor FACS Approach	1
Investigation of the Modulation of the ATPase Activity of Human Multidrug Resistance Protein 3 (MDR3/ABCB4) by Bile Acids	1
Derivation and Characterization of Hepatocyte-Like Cells from iPSCs Derived from Urine Progenitor Cells of an African Male Bearing the CYP2D6*4/*17 Variant Conferring Intermediate Drug Metabolizing Activity	1
The Human Proteins MDR3 (ABCB4) and MDR1 (ABCB1) Share High Levels of Identity, yet Transport Structurally Unrelated Compounds	1
Taurine Transporter Knockout Induces Hyperammonemia and Oxidative Stress and Senescence in Mouse Liver	1
A Novel, Cell-Based Assay Confirms Antibody-Induced Bile Salt Export Pump (BSEP) Deficiency by Testing Patient Serum for BSEP Inhibition	1
Apoptosis Assays in Liver Research - an Overview	2
Liver Regeneration after Partial Hepatectomy is Triggered by Perfusion Dependent Angiocrine Signal Expression	2
Quantitative and Qualitative Analysis of Extracellular Vesicles and Their Associated Cargoes in Patients with Liver Diseases	2
Role of the Bile Acid Receptor TGR5 (GPBAR1) in Cholangiocarcinoma (CCA)	2
MAPKAP Kinases 2 and 3 Control the Initiation as well as the Resolution of the Inflammatory Response of Macrophages	2
Dimerization Interfaces of the GPCR TGR5 Revealed by Integrative Modeling	2
The Role of Adiponectin Signalling in an iPSC-Based Model of Nonalcoholic Fatty Liver Disease	2

Deletion of Thrombin Receptor PAR4 Improves Metabolic Status and Shows Less Severe NAFLD in Mice Fed High-Fat Diet	2
Effects of Pharmacological Inhibition of the Chemokine CXCL12 on Experimental Liver Fibrosis	2
The Membrane-Bound Bile Acid Receptor (TGR5) Controls the Immune Response against <i>Listeria monocytogenes</i>	2
Reprogramming of Pro-Inflammatory Human Macrophages to an Anti-Inflammatory Phenotype by Bile Acids	2
Free Energy Calculations of TGR5 Dimerization	2
Influence of Hepatocytes on Macrophage Differentiation	2
Role of Rhomboid Like Proteases in Endotoxin Induced Liver Damage	2
The TGR5 Expression is Reduced in Livers of PSC Patients and <i>Mdr2</i> <sup>-/-</sup> Mice	2
Investigations on the Influence of Ammonia on Chemical Exchange Saturation Transfer (CEST) Imaging of Proteins	2
Generation of Induced Mesenchymal Stem Cells from Human Peripheral Blood Mononuclear Cells by Lentiviral Reprogramming	3
StemNet: Engineering of Pluripotent Stem Cell-Derived Hepatocyte-Like Cells for High-Throughput Applications and Regenerative Medicine	3
Inhibition of PDGF Signaling Promotes Hepatic Differentiation of Stellate Cells from Rat Liver	3
Laminin-521 Supports the Quiescent State of Isolated Rat Hepatic Stellate Cells	3
Exploring Methylome and Transcriptome of Activating Hepatic Stellate Cells	3
Transplanted Human Pluripotent Stem Cell-Derived Mesenchymal Stem Cells Differentiate into Hepatocytes and Improve Hyperbilirubinemia in Gunn Rats	3
Mimicking Metabolic Liver Zonation Restores Functional Heterogeneity in Cultured Hepatocytes	3
The Impact of the Intercellular Communication Between Macrophages and Hepatocytes on an Infection with Cytomegalovirus (CMV)	4
Extension of the Donor Pool by Using HCV Positive Kidneys	4

154 Different Genetic Variants were Detected by FIC1, BSEP and MDR3 Sequencing in 427 Patients with a Cholestatic Phenotype	4
Investigation of the Effect of the NAE Inhibitor MLN4924 on Hepatitis C and D Infection	4
A Comparative Molecular Analysis of Viral DDB1-Interacting Proteins Reveals Overlapping as well as Specific Interactomes	4
Neutralizing Activity of Non-Polyreactive Monoclonal Antibodies Directed against the Hepatitis C Virus Isolated from Patients with Spontaneous Viral Clearance	4
HCV Triggers the Release of CXCR2 Ligands via an EGF-Driven Circuit	4
Liver Immunopathology Induced by LCMV	4
Gut Microbial Translocation Corrupts Myeloid Cell Function to Control Bacterial Infection During Liver Cirrhosis	5
Slowed Alpha Peak Frequency in Hepatic Encephalopathy is Linked to the Reduced Critical Flicker Frequency and Decreased Occipital GABA Concentration	5
Optical Analysis of Surface AMPA Receptors in a Model of Hepatic Encephalopathy	5
Molecular Determinants of Glutamine Synthetase Deactivation by Tyrosine Nitration	5
Deletion of WISP1 Leads to Higher Sensitivity upon Acute Liver Damage.	5
Cerebellar Inhibition in Hepatic Encephalopathy - a Transcranial Magnetic Stimulation Study	5
Ammonia Affects Iron Homeostasis in Cultured Rat Astrocytes and in Human Cerebral Cortex in Hepatic Encephalopathy	5
Impaired Temporal Tactile Discrimination in Patients with Hepatic Encephalopathy	5
Effects of Repetitive Magnetic Stimulation on HE-Associated Alterations in Synaptic Plasticity - Cellular and Molecular Mechanisms	5
The Liver Specific microRNA-122 Modulates Hepatic Response to Infection and Inflammation by Antagonizing YY1, FoxP3, Nfr1 and E2F4 Molecular Networks	5
Platelet Defects upon Surgical Liver Disease Models in Mice	5
Hpgd Is Critical for Regulatory T-Cell Function in Adipose Tissue	5
